Dear Mr. Washburn,

I am writing concerning the proposed remedy to the radioactive materials contaminating the West Lake landfill in Bridgeton, Missouri. The resolution proposes to remove approximately 70% of the material containing the radioactive waste. This is unacceptable in this urban area, and I urge the EPA to fully excavate these remains from a government program many years ago, and to store them off site in an area that has been prepared as a safe disposal repository for radioactive waste.

Thank you for receiving my comment.
